
He Wouldn't Hurt a Flea!

Problem is: You're Not a Flea!!

Even the "nicest" dog will sometimes *bite* when he is startled or feels his territory is threatened.

So keep these four tips in mind when there are signs that a dog is around:

- ❖ Some dogs bark and bite. Other dogs are quiet and bite.
- ❖ Don't be too quiet yourself. Make enough noise before you enter a yard to alert any snoozing hounds.
- ❖ Even if a dog is wagging its tail while approaching you, be ready for its attitude to change in an instant.
- ❖ You can't outrun a dog, but you can be close enough to your truck to "hop back in" (another reason to find out if there's a dog around before you step too far away from your vehicle).
